

Wyse Xenith™

The **zero client** built for Citrix

Fact sheet

WYSE
| | | |

New Wyse Xenith. Zero has never meant so much.

New Wyse Xenith delivers the intelligent cloud-based or virtual desktop client we know you've been waiting for. Built for Citrix XenDesktop and XenApp, Wyse Xenith is where 'zero' really adds up: delivering a Citrix HDX™ Ready experience with zero delays, zero management, zero security risks and (almost) zero energy use. Leaving nothing to stop this instant-on, plug-n-play, virus immune and high performance zero client from transforming the way you deploy intelligent desktops right across your enterprise or organization.

It's everything you want from a Citrix Ready zero client.

Specifically created to maximize your return on investment in Citrix technology, Wyse Xenith represents an entirely new approach to investing in, deploying and supporting intelligent desktop devices. Its compact efficient design provides significantly better performance than its nearest competitors with a range of powerful time-saving productivity features from instant-on, rapid 5 second login screen access - to fast gigabit LAN and optional wireless-n connectivity.

The desktop just got a lot easier.

Management is easy too as Wyse Xenith communicates with your XenDesktop server taking care of initial set-up, monitoring for updates through the network and give you the precise control you need (when and if you need it). A custom Citrix Receiver for Wyse Xenith, designed by Wyse in collaboration with Citrix, is integrated into Wyse Xenith's engine ensuring continued access to a host of existing and forthcoming Citrix HDX features. And, with no Windows or Linux APIs present for viruses to latch on to, there's no need for local firewalls or anti-virus software on Wyse Xenith.

At a glance:

Zero delays

- The zero client built for Citrix.
- Ideal for cloud or virtual desktop environments.
- Instant-on in 2 seconds.
- Best user experience of any HDX Ready zero client.
- Fast gigabit LAN.
- Optional wireless-b/g/n.

Zero management

- Always up to date - integrated intelligence communicates directly with your Citrix XenDesktop server for automatic discovery, configuration, and ongoing feature updates. No additional management software required.
- Completely reconfigurable to take advantage of advancing technology.

Zero risk

- Immune from Windows or Linux based viruses and malware.

And (almost) zero energy use

- Wyse Xenith draws less than 7 watts of power in use, sleeps at less than 1.
- Save \$70 a year in energy compared to a PC*.
- No other multimedia-rich client uses less energy.
